## Skills & Expertise

## Goals and Motivation

My goal in my professional career is to be able to improve the lives of people through good design. I am passionate about improving the way people interact with technology and its beneficial effects on society. My wide range of skills and knowledge informs every project I take on, giving my solution a unique and well informed base.

I am also proficient in traditional backend development languages which help in building a seamless and streamlined user experience as well as working with IT and development professionals in larger corporations.

I personally enjoy learning and experimenting with new technologies, this hobby feeds into my approach and influences forward thinking design.

Please get in touch if you need any more information or would like to discuss my design process. I work hard and learn fast, my knowledge and skills will be a great asset to your company.

I look forward to hearing from you.

## Achievements
